| The user can only create sub-boards up to 3 levels below a board.  When hovering over the level 3 sub-board in the left hand side menu, the icon to add another sub-board is still present and inactive. This can create confusion because there is no mention anywhere that sub-boards can only be created to 3 levels.  Can you please remove that icon? (see attached). Alternatively please add tooltip advising the user that no more sub-boards can be added.  To reproduce:  1. Access a new or existing Drop. 2. Create a board with 3 nested sub-boards. 3. Hover over the level 3 sub-board.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |  |  |
