

## Exploratory Testing Week – Challenge 3. Bug 2-1

<b>ID</b>	2-1
<b>Status</b>	New
<b>Summary</b>	Please remove kebab menu and heart “like” icons from hover-over when a file is selected
<b>Category</b>	Enhancement request
<b>Severity</b>	Minor
<b>Description</b>	<p>When a file is selected and hovered over, it displays a kebab menu and a heart “like” icon. These are inactive and clicking anywhere will only de-select and re-select that file, unless it’s the only file selected. In this case, clicking once will de-select the file and the kebab menu and like icon will become active.</p> <p>I found this to be very confusing and because I was so focused on using the kebab menu, I did not see that the menu options appeared at the top of the GUI.</p> <p>Can you please remove the kebab menu and heart icon from the hover animation when a file is selected? Alternatively please enable the menu and like and apply the action to all selected files.</p> <p><b>To reproduce:</b></p> <ol style="list-style-type: none"> <li>1. Access a new or existing Drop.</li> <li>2. Select one or more files.</li> <li>3. Hover over any file and click on the like icon or kebab menu</li> </ol>
<b>Environment</b>	<p>OS: Windows 10 Pro Version 20H2</p> <p>Browser: Opera - Version:75.0.3969.149</p>
