Exploratory Testing Week – Challenge 3. Test session 2

ID	2
Charter	Explore MeeroDrop and create a product coverage outline. Refer to Heuristic Test Strategy Model - Product Elements and "A FEW HICCUPS" heuristic. Report any bugs found.
Charter Fulfilled? Y/N	No - Need to explore the product more around operations, especially disfavoured use and extreme use.
Tester(s)	Alex Morosan
Start Time	06/04/2021 - 16:00
Duration (in minutes)	35
Test Execution Time %	80
Bug Investigation Time %	20
Setup & Admin Time %	0
Environment	OS: Windows 10 Pro Version 20H2 Browser: Opera - Version:75.0.3969.149
Test Notes	Used the Heuristic Test Strategy Model to create a framework for the product coverage outline using XMind 8. Reviewed "A FEW HICCUPS" heuristic - list of "consistency" oracles prior to session. Used "Long leash" heuristic to maintain focus while having a bit of freedom to follow up on hunches. Started interacting with the application in a more systematic fashion. Started at the top of the GUI, then moved to the left-hand side menu and main panel. Got confused when selecting files and trying to interact via kebab menu. I was so focused on trying to clock that menu that I did not realise the options appeared on a new menu at the top of the GUI (inattentional blindness). Raised Bug #2-1 (enhancement request). Please see attached PCO for more notes. Will continue the session for another 30 minutes to explore further.
Bug Summaries	Bug #2-1: Kebab menu and like icon are inactive on hover over animation when a file is selected (enhancement request)

Exploratory Testing Week – Challenge 3. Test session 2

Issues	No isssues
